ACOUSTIC
BENEFITS

noise reducing

The ultimate way to add a feature wall or dramatic ceiling effect to your interior with the added bonus of reducing noise levels!

Slat Legends Ultra wall panels, made from MDF with a wood veneer finish, help to reduce sound levels and reverberation within busier areas of the home or business by the addition of a subtle black felt liner.

Upon installation, the felt lining on the rear of the wall panels offers an immediate acoustic improvement without the need for a separate sound proofing product to be installed.

Ranging from sophisticated Black Oak to scandi style Natural Ash, you can create a nature inspired feature wall or ceiling to suit any room.

With their simple modular design, this allows for an effortless installation so you can create a fresh and calming environment with minimal effort or equipment required.

Panel size:
2.4m x 600mm x 21mm
